

WEINIG WORKS WOOD

**Machines and systems for
solid wood and panel processing
in WEINIG quality**

Welcome
to LIGNA 2015

11 to 15 May 2015, Hanover

WEINIG: Hall 12, stand B50-F50

HOLZ-HER: Hall 11, stand B46-C46

Welcome

to the "WEINIG Technology Offensive" at LIGNA. More than 30 exhibits await you over more than 3,500 m² of exhibition space. In Hall 12, you can experience the world of solid wood processing. Meanwhile, panel processing specialists HOLZHER are in close proximity in Hall 11.

WEINIG is a complete provider and will be presenting an abundance of new, pioneering technologies to you in Hanover. From cutting, planing and profiling and window production to CNC processing and edge banding, you will find the perfect solution for your production requirements with us.

Optimal value creation is at the heart of everything we do. We will show you how you can master even highly complex processes simply and reliably with WEINIG. From planning and implementation to our comprehensive service offering, WEINIG always offers you the security of being in safe hands.

Yours

Gregor Baumbusch
Chief Sales and Marketing Officer

WEINIG Technology Offensive

Take inspiration from new concepts and ideas that will not only revolutionize your production but will significantly improve your prospects in the market.

NEW Machines and systems that set standards in performance and profitability.

NEW Intelligent, networked production concepts for maximum value creation.

NEW Customized solutions – from application to service.

For further information, visit www.weinig.com

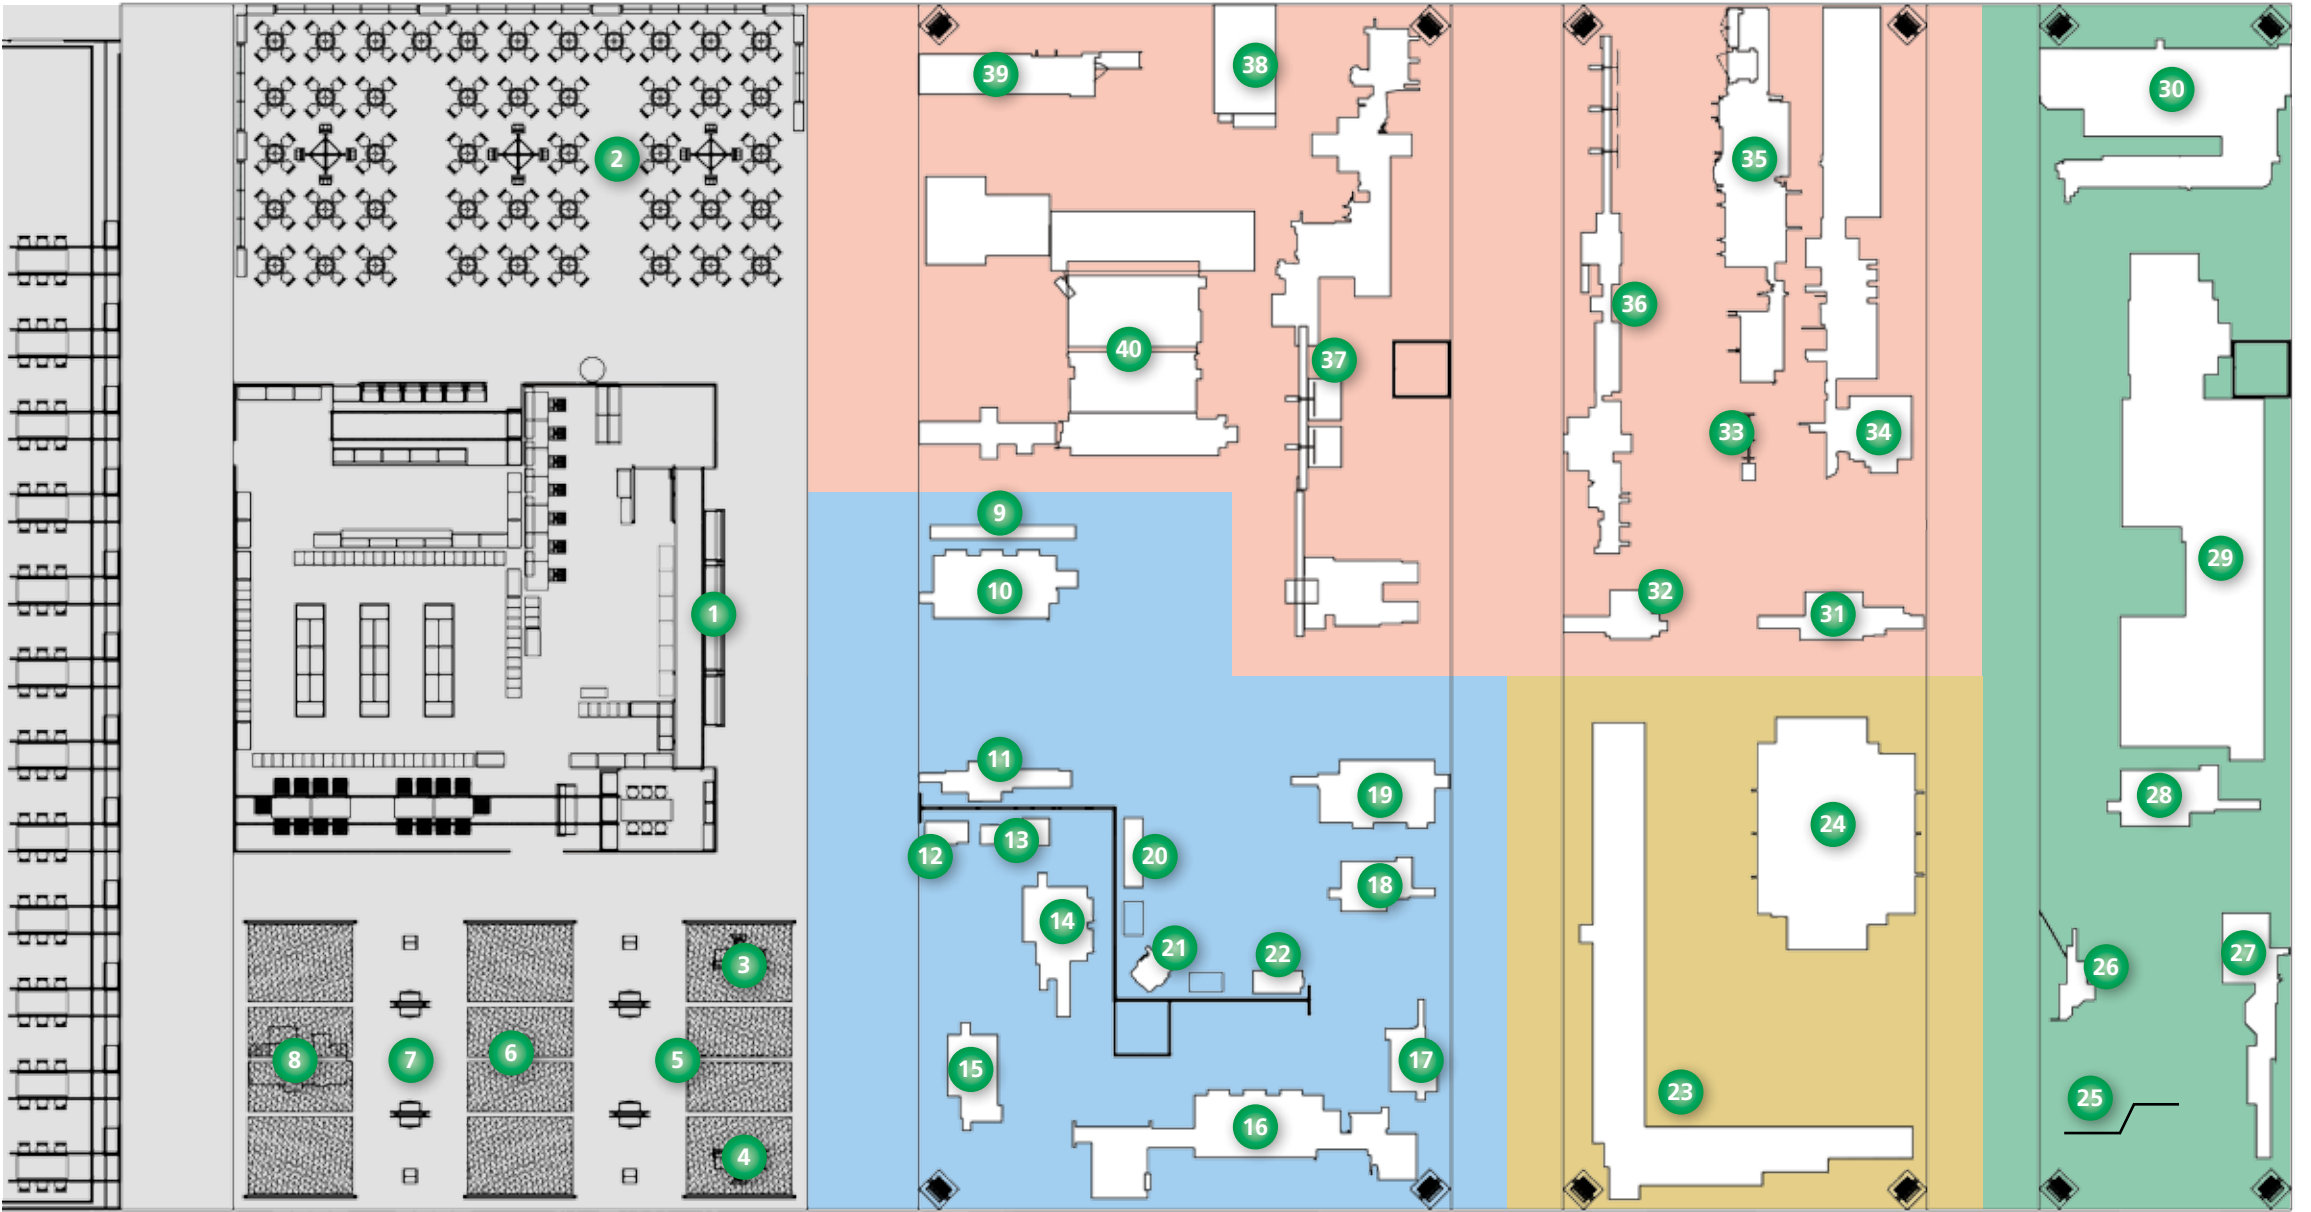

Anybody who makes an income from wood has made a sound, future-proof choice. As a sustainable material, wood is without any real alternative in our world where there is an increasing emphasis on efficiency of resources. With its good static performance and individual appearance, solid wood is an increasingly popular construction material, both for interior fittings and exterior uses. As a technology leader in solid wood processing,

WEINIG is helping to drive this trend. WEINIG machines and systems achieve optimal timber yields with ever-decreasing energy consumption, ensuring cost-effective production for our customers and the protection of resources. Furthermore, our customers benefit from synergies within the Group between members with solid wood expertise and panel processing specialist HOLZ-HER.
