

Gluing presses at WEINIG DIMTER

We cordially invite you to an unique event on the **4th and 5th of October** in Illertissen. On both days we present you a wide range of presses for panel and window scantling production. Thereunder not only our well-known demo machines PPL II, PPT and PPL B will be shown, but also as a highlight various customer machines in the phase of assembly or function testing.

HIGHLIGHTS

Live-Show

ProfiPress T 5400 Next Generation - up to now the greatest high-performance gluing plant for the production of high-quality hardwood panels, build by WEINIG DIMTER

Visits

PPC 14400 P	PPC 3200P	PPT 2500 NG	PPL B 3100x650	Cutting system
for gluing of large-sized panels size 14,2 x 3,55 m for the production of CLT	for the production of approx. 3200 m² top layers per shift	with cross-cut saw (angular cut) (+/- 8 degrees) for the production of softwood panels	with automatic gluing and track by track packet assembly station	for hardwood panels consisting of cross and length cutting saw for an existing PPT 5500
